**Wine is not only important to Hungarians but it has a several thousand-year history in mankind life. Although, there are 24 historical vineyards in our country, among them so famous places like Tokaj, Villány, Badacsony and the long culture and tradition of wine consumption, there is a high incidence of cardiovascular disease with the resultant serious decrease in life expectancy in this region.**

**This symposium will provide a good opportunity for scientific exchange and informal discussions with members of faculty and also with the representatives of the Medical Experts and “Hungarian Wine Academy”.**
