 **25th Anniversary of the Hungarian Kidney Foundation** 

Welcome to Budapest Nephrology School

Background

- History of the Hungarian nephrology
- Strong start at turn of 19th/20th century

von **Sándor Korányi**

1866 - 1944

FIRST:

- applied freezing point reduction to measure osmotic activity of urine
- measured renal function by concentrating ability
- coined the term „renal insufficiency” and hypostenuria

- **Brake in further development of nephrology at eighties**
- **Establishment of Hungarian Kidney Foundation 1987**

Establishment of Hungarian Kidney Foundation

Established:

In 1987 by Laszlo Rosivall

Type:

Charity, public foundation

Aim:

To support the development of education, research and clinical practice of nephrology

Strategic plans:

- provision of **grants** by applications
- establishment of **Nephrology Research and Training Centre**, 1990
- **academic nucleus** by inter-departmental network
- **training** young talented nephrologists at international levels
- establishment of **PhD program**, 1993
- establishment of an **international refreshing course**, 1994
- establishment of **Awards**

Idea of Budapest Nephrology School - early nineties: HKF and ISN

by Nancy Humphrey

Dr. Roscoe R. "Ike" Robinson, an internationally recognized physician and educator who led the Vanderbilt University Medical Center through a period of tremendous growth and change during the 1980s and 1990s, died Saturday, Aug. 7. He was 74.

Robinson, professor of medicine and vice chancellor for health affairs, emeritus, served from 1981 until 1997 as the chief executive and academic officer for all of Vanderbilt's programs in health, including those of the Schools of Medicine and Nursing, the Medical Group, University Hospital, Children's Hospital, Psychiatric Hospital, the Stallworth Rehabilitation Hospital and Health Services.

Robinson died after suffering from idiopathic pulmonary fibrosis, an incurable, progressive lung disease, since 1998.

Suggestion to Ike to support a regional education center in Central Europe to foster the development of nephrology in ex-socialist countries

Benefit

- low cost
- convenient location
- easy follow up
- easy understanding

Outcome

Education and training of critical number of physicians and researchers from Hungary and neighbouring countries: Training of about 1000 physicians at postgraduate level and 150 at graduate level

Why in Budapest?

- history, location, hospitality

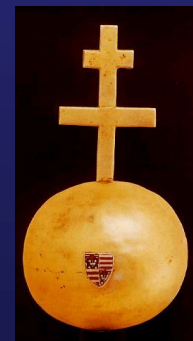

Established 896, The first Christian King was coronated in 1001.

Territory: 93 000 km²

Population: 9,9 million (demographic ratio <1)

Population density: 109 person/ km²

Official language: Hungarian (Finno-Ugrian)

„Are you aware that there is a language that because of its constructive ability and the harmony of its rythm I have placed on the same level as Greek and Latin? It is the Hungarian language! I know the poems of the new Hungarian poets and their musics has completely enchanted me. Keep your eyes on future developments and you will witness such an upsurge in poetic genius, which will totally justify my prediction”
